COMMERCIAL PROPOSAL & TECHNICAL SPECIFICATIONS

Heavy-Vehicle Workshop Operating System

DriveFlow — Commercial Vehicle Workshop ERP

A specialized digital workshop management system engineered for Indian heavy-vehicle service centers, fleet maintenance depots, truck and bus body builders, container fabrication facilities, and full-service commercial vehicle garages.

Executive Overview

COMMERCIAL FLEET OS

DriveFlow is a production-tested digital operating system engineered specifically for heavy commercial vehicle workshops in India servicing heavy trucks, tippers, multi-axle haulers, buses, vans, and pickups across Tata Motors, Ashok Leyland, BharatBenz, Eicher, and Mahindra platforms. DriveFlow coordinates complex commercial repair workflows across mechanical overhauls, body building, tinkering, painting, and auto-electrical repairs—pairing digital job cards with a serialized QR storekeeper counter, driver/transporter registry, Fitness Certificate tracking, intra-state GST billing, and local TallyPrime synchronization.

Multi-Trade Work Orders: Mechanical, body fabrication, paint & electrical on one card.

Parts Room Control: Dedicated QR-scanning counter terminal with direct job allocation.

GST & Tally Integration: Intra-state tax invoices with XML/CSV export and TallyPrime push.

Commercial Structure: DriveFlow Workshop Plan (Founding Customer Edition)

All prices exclusive of 18% GST

Designed to provide commercial vehicle service centers with full software capabilities under predictable, transparent commercial terms. Choose from three flexible payment models:

MODEL A

Monthly Subscription

INR 4,499 / month

12-month minimum commitment. Billed monthly in advance.

Full system access for up to 10 active workshop users.

MODEL B — RECOMMENDED

Annual Prepaid

INR 44,990 / year

2 months complimentary (effective **INR 3,749/mo**). Billed annually upfront.

Best value for commercial workshops. Saves INR 8,998/yr.

MODEL C

Perpetual License

INR 1,15,000 one-time

Perpetual software license ownership for up to 10 user seats. Includes 12 months support.

Year 2+ AMC: **INR 23,000/yr** (20%). DB hosting paid by client.

> **Founding Customer Terms:** All subscription rates quoted above are strictly locked for 12 months from your workshop's go-live date. Standard commercial list price following the founding phase will be INR 5,999/month or INR 59,990/year.

What's Included in the Workshop Plan

- **Up to 10 Active User Accounts** across Admin, Manager & Staff.
- **Dedicated Cloud Database** provisioned specifically per workshop.
- **Automated Daily Backups** with standard 7-day snapshot retention.
- **Regular Software Updates** and feature improvements included.
- **Standard Support** via telephone, email, and remote desk.

Onboarding Setup & Add-On Services

- **One-Time Setup Fee:** INR 15,000 to 25,000 (depends on historical data volume: customer/fleet migration, rate card config, printer mapping & staff training).
- **Additional Staff Seat:** INR 199 / user / month (+ 18% GST).
- **Custom Development:** INR 1,500 / billable hour (+ 18% GST).
- **Messaging:** One-tap WhatsApp click-to-chat links & email links included.
- **Optional PITR:** Point-in-time recovery available as pass-through cost.

WORKSHOP OPERATIONS

Workshop Floor Operations & Multi-Service Job Cards

Engineered for multi-trade commercial repair facilities, open workshop yards, and body building sheds.

Multi-Service Digital Job Cards (/admin/work-orders)

CORE WORKFLOW ENGINE

Heavy-vehicle repairs are rarely single-scope tasks. A commercial truck or bus frequently requires simultaneous mechanical repairs, body fabrication, tinkering, repainting, and electrical rewiring. DriveFlow structures multi-service job cards to handle complex vehicle check-ins with precision:

Multi-Trade Service Grouping:

- **Mechanical Services:** Engine overhauls, clutch plate replacement, gearbox repairs, differential servicing, brake shoe relining, suspension & leaf spring repairs.
- **Body Building & Tinkering:** Cabin tinkering, cabin mount repairs, chassis alignment, crash repairs, footboard fabrication, and container frame structural welding.
- **Painting & Surface Prep:** Full chassis painting, cabin painting, container body lettering, primer coating, and anti-rust undercoating.
- **Auto-Electrical Works:** Starter motor overhaul, alternator repair, complete wiring harness rewiring, battery testing, and lighting installation.

Intake Inspection & Approvals:

- **Belongings & Tool Inventory:** Vehicle intake checklist logging commercial items—stepney wheel, jack, wheel spanners, tarpaulin, battery clamp, and cabin equipment.
- **Visual Damage Photo Dropzone:** High-resolution intake photo uploads capturing accident impact, existing structural cracks, dent severity, and pre-repair condition.
- **Customer Estimate Approval:** Itemized preliminary cost estimates combining expected parts and labor. Customer approval status is recorded before work begins.
- **Complaint Documentation:** Detailed capture of driver-reported issues, customer complaints, and service advisor diagnosis notes.

5-Stage Live Workshop Progression (/admin/progress)

YARD VISIBILITY

Stage-Driven Workflow

Unlike passenger car garages with rigid numbered service bays, commercial vehicle repair facilities operate across expansive yards, heavy vehicle lifts, fabrication sheds, and outdoor inspection bays. DriveFlow tracks every active vehicle through **5 verified operational progression stages**:

STAGE 1	STAGE 2	STAGE 3	STAGE 4 & 5
Inspection	**Repair**	**Review**	**QC & Delivery**
Intake diagnosis, photo capture, belongings check & initial quotation.	Active mechanical overhaul, tinkering, bodywork, wiring & paint prep.	Supervisory review of completed work, parts reconciliation & labor audit.	Roadworthiness inspection, final billing, gate pass issuance & handover.

Service advisors and yard supervisors monitor vehicle progression in real time, updating stages with one touch as vehicles move from mechanical sheds to paint booths or delivery lanes.

Technician Floor Terminal (/staff)

Mechanics, body builders, and electricians access a dedicated mobile/tablet floor interface. Floor personnel view assigned work orders, check specific repair instructions, log parts issued from the storekeeper counter, and upload progress photos directly from the workshop floor without requiring paperwork.

Task Transparency: View line-item work assigned per vehicle.

Floor Photo Proof: Upload post-welding or paint finish images.

Spares Requisition: Request parts directly against active job card.

FLEET & INVENTORY CONTROL

Commercial Vehicle Master, Fleet Linkage & Inventory Counter

Indian RTO compliance, fleet transport management, and serialized QR storekeeper operations.

Commercial Vehicle Master & RTO Compliance (/admin/vehicles)

COMMERCIAL REGISTRY

DriveFlow's vehicle registry is purpose-built for commercial transport assets, incorporating statutory compliance parameters required by Indian Regional Transport Offices (RTO):

Heavy Vehicle Classification & OEMs:

- **Commercial Vehicle Categories:** Multi-axle heavy trucks, tippers, container haulers, prime movers, full-size buses, staff vans, LCVs, and pickups.
- **Indian Commercial OEMs:** Pre-built support for Tata Motors, Ashok Leyland, BharatBenz, Eicher Motors, Mahindra & Mahindra, Force Motors, and SML Isuzu.
- **Chassis & Engine Serial Tracking:** Mandatory VIN / chassis number and engine number logging essential for commercial warranty and major overhauls.
- **Indian Registration Plate Display:** Visual high-contrast plate preview formatted with state and RTO codes (e.g., TN-38-AA-1234, KA-01-E-5678).

Fitness Certificate (FC) Lifecycle:

- **FC Number & Expiry Tracking:** Record commercial vehicle Fitness Certificate numbers, issue dates, and statutory renewal deadlines.
- **Proactive FC Renewal Alerts:** Visual dashboard indicators and service due alerts flagging approaching FC expiry dates.
- **FC History & Inspection Records:** Historical log of past fitness renewals, RTO passing dates, and related repair work orders.
- **Complete Service Timeline:** Chronological service history tracking past visits, parts fitted, and cumulative maintenance costs.

Fleet Companies, Transporters & Driver Directory

TRANSPORT OPERATIONS

Transport Company CRM (/admin/customers):

Manage commercial fleet accounts, logistics contractors, and transport companies. Maintain company GSTIN, billing addresses, credit limits, and multiple contact persons (fleet manager, accountant, managing director).

Dedicated Driver Registry (drivers table):

Link authorized drivers to commercial vehicles and specific work orders. Capture driver contact numbers and driving license details for gate authorization, vehicle handover, and delivery coordination.

Parts Room Control & Storekeeper Counter Terminal (/inventory/room)

ANTI-SHRINKAGE Direct Job Allocation

Spares and consumables represent over 60% of commercial vehicle repair ticket value. DriveFlow provides strict storekeeper controls to eliminate untracked parts loss:

Storekeeper Counter Terminal (/inventory/room):

- **Standalone Counter Interface:** Dedicated terminal designed specifically for parts room storekeepers to issue spares quickly without full admin access.
- **Camera Barcode & QR Scanner:** Instant camera-driven barcode and QR scanning for swift part lookup, stock issuance, and receiving.
- **Serialized Units & QR Tags:** Track high-value components (alternators, turbochargers, leaf spring sets, starter motors, batteries) by unique serial numbers.

Job Card Allocation & Stock Control:

- **Direct Job Card Allocation:** Spares are issued strictly against authorized work order numbers, locking part costs directly into the job bill.
- **Parts Returns Processing:** Unused spares or core returns can be credited back to inventory with automatic work order adjustments.
- **Inventory Intelligence (/admin/inventory):** Reorder threshold alarms, supplier directories, purchase cost vs. selling price margins, and stock ledger.

BILLING, ACCOUNTING & WORKFORCE

GST Invoicing, Tally Accounting, Payroll & Customer Experience

Intra-state statutory tax compliance, direct Tally integration, multi-mode workforce wages, and client portal.

Intra-State GST Invoicing & Financial Operations (/admin/invoices)

TAX COMPLIANT

Statutory Tax Billing & Printing:

- **Intra-State GST Computation:** Accurate calculation of CGST (9%) + SGST (9%) totaling 18% GST across billable parts, consumables, and labor line items.
- **HSN & SAC Code Support:** Dedicated HSN codes for commercial spare parts and SAC codes for labor/fabrication services printed on tax invoices.
- **Dual Print Studio:** One-click generation of professional full-page A4 tax invoices/estimates and compact 3-inch thermal receipts for gate passes.

Credit Ledgers & Payment Settlement:

- **Customer Credit Ledger (/admin/ledger):** Running account statements for transport fleet operators, maintaining outstanding balance records.
- **Partial & Multi-Mode Receipts:** Record partial receipts, advance deposits, and settlement transactions via Bank Transfer, UPI, Cheque, or Cash.
- **Quotation to Invoice Conversion:** Seamlessly promote approved estimates into finalized tax invoices with zero re-entry.

Tally Accounting Bridge (/admin/tally)

TALLY COMPATIBLE

XML / CSV / Direct Push

DriveFlow bridges garage floor billing with your financial accounting back-office, supporting both standard file export and direct local push:

Voucher Export & Direct Push:

- **XML Voucher Export:** Export Tally-compliant XML sales and receipt vouchers ready for immediate import into Tally ERP 9 and TallyPrime.
- **CSV Ledger Export:** Generate clean Excel/CSV tables formatted for accounting review and audit reconciliation.
- **Direct TallyPrime HTTP Push:** Direct one-click push of vouchers to TallyPrime running on the workshop's local computer (port 9000).

Accounting Ledger Mapping:

- **Tax Ledger Mapping:** Automatic segregation of Output CGST, Output SGST, parts sales accounts, and service labor revenue accounts.
- **Customer Debtor Accounts:** Maps fleet customer names directly to Sundry Debtors ledgers within Tally.
- **Zero Manual Double-Entry:** Eliminates accountant re-typing of bills, preventing calculation errors and missing invoices.

Workforce Payroll & HR (/admin/salary)

Tailored wage calculations for commercial workshop technicians:

- **Flexible Wage Modes:** Monthly fixed salaries, daily wages, weekly settlements, and per-job/piece-rate technician labor payouts.
- **Overtime & Advance Deductions:** Track overtime hours, log salary advances, and deduct balances during payroll generation.
- **Attendance Roster (/admin/attendance):** Daily technician attendance with staff self-punch terminal mode.
- **Document Locker (/admin/employees):** Internal document repository for technician identity and license records.

Customer Portal & Service Tracker

Transparency for fleet owners without app downloads:

- **Live Customer Web Portal (/customer):** Vehicle owners and fleet managers track live 5-stage progress directly in browser.
- **Inspection Photo Review:** Customers view uploaded intake and repair photos, enhancing trust for major bodywork.
- **Online Estimate Approval:** Review itemized job estimates and confirm approval digitally.
- **Service Due Tracker (/admin/service-due):** Track preventive maintenance by odometer reading and calendar intervals.

SCOPE & VERIFICATIONS

Scope Notes & Verified Feature Entitlement Matrix

Clear operational boundaries, architectural parameters, and complete route-level feature entitlements.

Operational Scope Notes & Architectural Parameters

• **Tax Scope:** GST billing currently supports intra-state transactions (CGST + SGST at 18%). Inter-state IGST, government e-invoicing (IRN), and e-way bill generation are currently in product development.

• **Network Connectivity:** DriveFlow is a cloud-native web platform requiring an active broadband, Wi-Fi, or 4G/5G mobile hotspot connection. Offline mode without internet is not supported.

• **Single Branch Architecture:** Quoted plans cover a single workshop location. Multi-branch consolidated operations require independent software deployments.

• **Fixed User Roles:** Access control provides four pre-configured roles: Administrator, Manager, Staff (Technician/Storekeeper), and Customer. Custom dynamic role creation is scheduled on the roadmap.

System Route / Path	Verified Functional Module & Scope	Plan Status
/admin/customers	Customer & Fleet CRM Directory, transport company profiles, contacts, GSTIN	Included
/admin/vehicles	Commercial Vehicle Master, Indian registration plates, chassis & engine numbers, FC tracking	Included
/admin/vehicles/:id	Vehicle Service History, odometer timeline, past work orders, FC renewal records	Included
/admin/work-orders	Multi-Service Digital Job Cards (mechanical, body, tinkering, paint, electrical), belongings checklist	Included
/admin/invoices	Intra-State GST Invoicing (CGST 9% + SGST 9%), HSN/SAC codes, A4 & 3-inch thermal printing	Included
/admin/inventory	Spare Parts Inventory, reorder threshold alerts, supplier catalogs, margin analysis	Included
/inventory/room	Storekeeper Counter Terminal, camera barcode/QR scanning, serialized QR units, job allocation	Included
/admin/progress	5-Stage Live Progression Monitor (Inspection → Repair → Review → QC → Delivery)	Included
/admin/ledger	Customer Credit Ledger, transporter running balance, credit limits & payment statements	Included
/admin/appointments	Service Booking Calendar, slot allocation, customer-vehicle auto linking	Included
/admin/service-due	Periodic Maintenance Mileage & Calendar Tracker with one-tap contact links	Included
/admin/reminders	Workshop Task Notes & Follow-Up Reminders for service advisors and floor supervisors	Included
/admin/attendance	Staff Attendance Master, daily technician punch log & staff self-punch terminal mode	Included
/admin/salary	Technician Payroll Engine supporting monthly, daily, weekly, and per-job piece-rate wages	Included
/admin/employees	Employee Registry and internal document storage locker for identity and license files	Included
/admin/tally	Tally Accounting Bridge: XML & CSV sales/receipt vouchers + local TallyPrime HTTP push	Included
/admin/analytics	Operational Dashboards: vehicle check-in volume, job card status, and revenue breakdown	Included
/staff	Technician Floor Mobile / Tablet Terminal for work orders, parts requests & photo uploads	Included
/customer	Live Vehicle Status Customer Portal: 5-stage progress tracking & estimate approval	Included

Cloud Infrastructure & Security Architecture

PostgreSQL Engine: Dedicated cloud database instance provisioned per workshop.

Data Encryption: Encrypted in transit (TLS) and at rest across all workshop records.

Backup Retention: Automated daily database snapshots with 7-day backup retention.

ROADMAP & AGREEMENT

Planned Product Roadmap, Onboarding & Authorization

Upcoming heavy-vehicle features, structured onboarding stages, commercial terms, and signature acceptance.

Planned Heavy-Vehicle Product Roadmap

Future Capabilities (Under Engineering)

Planned Feature Module	Functional Scope & Operational Capability	Status
Insurance & Surveyor Claims	Claim number, surveyor inspection details, approved parts vs client liability, salvage tracking	Planned
Milestone & Advance Billing	Staged payment receipts and progress billing milestones for long-duration body builds	Planned
Fleet Consolidated Billing	Combined monthly statement-of-account billing covering multiple vehicles per transporter	Planned
Tyre & Axle-Position Tracking	Serialized tyre management, tread depth logging, retreading history, 10/14/18-wheeler axle mapping	Planned
Department-Wise Stage Workflows	Configurable stage flows (Tinkering → Fabrication → Surface Prep → Paint Booth → Mechanical → QC)	Planned
Bill of Materials (BOM) for Fabrication	Material recipe formulas for steel sheets, structural angles, primer, basecoat and clearcoat paint	Planned
GVW & National Permit Master	Gross Vehicle Weight rating, axle weight limits, national and state permit expiry alert tracker	Planned
Official WhatsApp Business API	Automated template delivery for estimates, invoice PDFs, and gate passes via Cloud API	Planned
Bulk CSV / Excel Data Ingestion	Self-service automated bulk importer for vehicle fleets, customers, parts catalogs, and opening stock	Planned
Multi-Branch & Centralized Hubs	Multi-location workshop governance with cross-depot spare parts transfer tracking	Planned
Government e-Invoicing & e-Way Bill	Direct NIC / IRP portal API connector for mandatory B2B e-invoices (IRN) and e-way bill generation	Planned
Inter-State IGST Tax Structure	Dynamic IGST tax calculation and compliance reporting for out-of-state commercial fleet clients	Planned
Custom Granular Role Permissions	Fine-grained permission editor defining view/edit/delete authority per button and module	Planned

Roadmap items can be prioritised or accelerated through custom development at INR 1,500/hour. A higher "Heavy-Vehicle Enterprise" tier incorporating these advanced modules will be announced as features release.

4-Stage Implementation Methodology (Target 3 to 7 Working Days)

STAGE 1
Data Migration
Collation of customer contacts, vehicle lists, spare parts & labor rate cards.

STAGE 2
Hardware Setup
Configuration of A4 printers, 3-inch thermal printers & counter terminals.

STAGE 3
Staff Training
Role-specific training for service advisors, mechanics, storekeepers & accountants.

STAGE 4
Live Cutover
Go-live transition with dedicated standby support (agreed 3–7 days target).

Terms: All prices exclusive of 18% GST. Subscription payable in advance. Annual contracts receive 2 months complimentary. Perpetual license (INR 1,15,000) includes 12 months support; customer pays own Supabase database; Year 2+ AMC is INR 23,000/yr (20%). Client retains 100% data ownership. Standard support SLA provides response within 4 business hours.

Proposal Authorization & Acceptance Sign-Off

By signing below, the parties confirm acceptance of the DriveFlow Workshop Plan (Founding Customer Edition), selected payment model, one-time setup fee, and operational scope defined in this proposal.

Authorized Representative: HavDox — SERVICE PROVIDER

Name: Executive Partner / Account Director
Designation: Enterprise Systems Lead
Date: October 8, 2026

Authorized Signatory: Client Workshop — CUSTOMER ACCEPTANCE
